- JavaScript
- React
- SQL
- C#
- .NET
- Git/GitHub
- Agile

ABOUT

I first discovered programming at Middle Tennessee State University, where I earned a minor in computer science. In my CS classes I realized I enjoyed both the logical problem solving and creativity of programming. I'm excited to now be purusing a career in software engineering, and I hope I can be a valauble menber of the Nashville development community

EDUCATION

Nashville Software School
Full stack software developer

Middle Tennessee State University
B.S. Journalism
Minor in Computer Science

EXPERIENCE

Nashville Software School   Nov. 2019 - May 2020
Software Developer

Intensive, full-time 6 month software development program learning full-stack technologies through the creation of applications in the group and individual setting.

- Created dynamic one page applications using HTML5, CSS3, JavaScript, React.js, Reactstrap/Bootstrap, C#, .Net, and SQL
- Employed APIs and JSON server for data manipulation
- Utilized Git and GitHub for version control and group and individual projects

Projects:
Hit the Road - Front End Capstone
- Travel planning web application for small-time musicians to plan national tours. Bands can use Google Maps to plan prospective routes at different venues across the country, and can save routes they like as tours. Bands can also use a calendar and messaging system to send booking inquiries to venues, who can respond via private message. When new venues register and create a profile with an address, a new marker is automatically added to the Google map of venues.

Group Projects:
Nutshell
- Social media app for hobby enthusiasts to organize their daily tasks, news, events, friends, and chat messages
Holiday Road
- Travel planning app for visitors to National Parks which allows users to build and save itineraries

Bloomberg News   Sep. 2018 - Nov. 2018
Reporter/Intern

- Reported on the municipal bond market and state/local government finance to a specialized audience of market professionals in leading finance newsroom
- Interviewed multiple market leaders and experts
- Utilized Bloomberg Terminal for research on state and local government finance and data visualization for stories
- Wrote compelling stories featured in Top news section of Bloomberg terminal

Various News/Communications   Jan. 2014 - May 2018
Reporter/Intern

- Worked for various news organizations including The Daily Telegraph, NHK, The Daily Caller, The Guardian, The Greeneville Sun, The Savannah Courier, and MTSU's Sidelines (and local Washington, D.C. nonprofit Casey Trees)
- Covered topics such as national politics, government surveillance, small-town life, environmental issues, and student life.
- Handled office logistics and mailings
- Conducted research on relevant legislation, events, and people
- Participated in staff editorial meeetings
- Managed simultaneous rolling deadlines
